Title	URL	Authors	Host item title
Comparison of mapping efficiency for small datasets using inverse distance weighting vs. moving average, Northern Croatia Miocene hydrocarbon reservoir		Ivšinić, Josip; Malvić, Tomislav	
Mathematical methods and terminology in geology 2022 : proceedings of reviewed papers / 4th Croatian scientific congress [on] geomathematics and terminology in geology			
Taložni okoliši i dubinski odnosi donjomiocenskih naslaga u Slavonsko-srijemskoj, Dravskoj i Savskoj depresiji		Bigunac, Dijana	
Small unconventional hydrocarbon gas reservoirs as challenging energy sources, case study from Northern Croatia		Malvić, Tomislav; Barudžija, Uroš; Pašić, Borivoje; Ivšinić, Josip	
Modeling of the geological probability procedure for the prediction of high flows in small streams, case study of Medvednica Mt., Croatia		Sudar, Vedran; Malvić, Tomislav; Vujnović, Tatjana; Ivšinić, Josip	
Recent advances in geomathematics in Croatia : examples from subsurface geological mapping and biostatistics		Malvić, Tomislav; Bošnjak, Marija; Velić, Josipa; Sremac, Jasenka; Ivšinić, Josip; Dinis, Maria Alzira Pimenta; Barudžija, Uroš	
Application of the modified Shepard's method (MSM) : a case study with the interpolation of Neogene reservoir variables in northern Croatia		Malvić, Tomislav; Ivšinić, Josip; Velić, Josipa; Sremac, Jasenka; Barudžija, Uroš	
Increasing efficiency of field water re-injection during water-flooding in mature hydrocarbon reservoirs : a case study from the Sava Depression, Northern Croatia		Malvić, Tomislav; Ivšinić, Josip; Velić, Josipa; Sremac, Jasenka; Barudžija, Uroš	
Odabir i geomatematička obrada varijabli za skupove manje od 50 podataka pri kreiranju poboljšanoga dubinskogeološkoga modela na primjeru iz zapadnoga dijela Savske depresije		Ivšinić, Josip	
Termodinamičke osnove za proizvodnju geotermalne energije		Ivšinić, Josip
