36TH IAS MEETING OF SEDIMENTOLOGY

DU BROV NIK

ABSTRACTS BOOK

12–16 June 2023, DUBROVNIK, **CROATIA**

36th International Meeting of Sedimentology
June 12–16, 2023, Dubrovnik, Croatia

ABSTRACTS BOOK

Organized by:
Croatian Geological Society (HGD) and International Association of Sedimentologists (IAS)

Organizing Committee
Lara Wacha, ***chair,*** *Croatian Geological Survey, Zagreb*
Katarina Gobo, *University of Zagreb, Faculty of Science*
Nikolina Ilijanić, *Croatian Geological Survey, Zagreb*
Tvrtko Korbar, *Croatian Geological Survey, Zagreb*
Marijan Kovačić, *University of Zagreb, Faculty of Science*
Duje Kukoč, *Croatian Geological Survey, Zagreb*
Borna Lužar-Oberiter, *University of Zagreb, Faculty of Science*
Maja Martinuš, *University of Zagreb, Faculty of Science*
Slobodan Miko, *Croatian Geological Survey, Zagreb*
Davor Pavelić, *University of Zagreb, Faculty of Mining, Geology and Petroleum Engineering*
Kristina Pikelj, *University of Zagreb, Faculty of Science*
Igor Vlahović, *University of Zagreb, Faculty of Mining, Geology and Petroleum Engineering*

Scientific Committee
Igor Vlahović, **president,** *University of Zagreb, Croatia*
Nevena Andrić Tomašević, *Karlsruhe Institute of Technology, Germany*
Bruno Campo, *University of Bologna, Italy*
Sonia Campos Soto, *Complutense University of Madrid, Spain*
Luca Caracciolo, *FAU Erlangen-Nürnberg, Germany*
Blanka Cvetko Tešović, *University of Zagreb, Croatia*
Shahin E. Dashtgard, *Simon Fraser University, Canada*
Andrea Di Capua, *National Research Council – IGAG, Italy*
Goran Durn, *University of Zagreb, Croatia*
Gianluca Frijia, *University of Ferrara, Italy*
Massimiliano Ghinassi, *University of Padova, Italy*
Luis Gibert Beotas, *University of Barcelona, Spain*
Bosiljka Glumac, *Smith College, USA*
Antun Husinec, *St. Lawrence University, USA*
Stuart Jones, *Durham University, UK*
Tvrtko Korbar, *Croatian Geological Survey, Croatia*
Marijan Kovačić, *University of Zagreb, Croatia*
Juan Carlos Laya, *Texas A&M University, USA*
Marta Marchegiano, *University of Granada, Spain*
Cole McCormick, *Pennsylvania State University, USA*
Mardi McNeil, *Geoscience Australia, Australia*
Theresa Nohl, *University of Vienna, Austria*
Shuxin Pan, *PetroChina – NWGI, China*
Guido Pastore, *University of Milano–Bicocca, Italy*
Maximiliano Paz, *University of Saskatchewan, Canada*
Daniel A. Petráš, *Czech Geological Survey, Czech Republic*
Miquel Poyatos-Moré, *Universitat Autònoma of Barcelona, Spain*
Joanna Pszonka, *Polish Academy of Sciences – MEERI, Poland*
John J.G. Reijmer, *Vrije Universiteit Amsterdam, The Netherlands*
Valentina Marzia Rossi, *National Research Council – IGG, Italy*
Arnoud Slootman, *Colorado School of Mines, USA*
Miroslaw Slowakiewicz, *University of Warsaw, Poland*
Thomas Steuber, *Khalifa University of Science and Technology, Abu Dhabi, UAE*
Finn Surlyk, *University of Copenhagen, Denmark*
Michal Šujan, *Comenius University in Bratislava, Slovakia*
Romain Vaucher, *University of Geneva, Switzerland*
Alan Vranjković, *INA Oil Company, Croatia*
Lara Wacha, *Croatian Geological Survey, Croatia*
Guodong Wang, *PetroChina, China*
Pujun Wang, *Jilin University, China*
Valentin Zuchuat, *RWTH Aachen University, Germany*
Nadja Zupan Hajna, *Research Centre of the Slovenian Academy of Sciences and Arts, Slovenia*

Theme 15. Sedimentology and hydrocarbons

Special Session 15.1. Seismo-sedimentological characterization of 3D seismic data

Oral presentation

Seismic geomorphology of Pannonian clastic reservoirs in Drava and Zala Basins, Pannonian Basin System

Tomislav Baketarić[1], Alan Vranjković[1], Ana Majstorović-Bušić[1], Željka Marić-Đureković[2], Davor Pavelić[3]

Mature basins provide a wealth of data for the reconstruction and mapping of their sedimentary evolution and architecture as well as regional paleo-geographic changes. In turn, these often lead to a better understanding of geological processes and thus provide a basis for novel concepts in exploration of subsurface. The Neogene Pannonian Basin System (PBS) nested between the Dinarides, Alps and the Carpathian arc in Central Europe is such a mature area with more than a century hydrocarbon exploration and production history. The upper Miocene to Pliocene sediments, referred to as Pannonian Stage, were initially deposited in an under-filled lake basin displaying gradual transgression followed by a powerful regression characterized by prograding and aggrading clinoforms on reflection seismic data. Relative chronostratigraphic framework was defined by clinoform sets mapped along with their rollover points across Drava and Zala basins. Based on seismic attributes, log patterns and available core data, clastic depositional features and architectures were delineated across different depositional environments within lake basin clinoforms. Each depositional feature is described upon its position within clinoforms, type of clinoform trajectory and typical log pattern. Finally, depositional features are described in their typical sizes (based on 3D seismic data) and reservoir quality. Integrating various data resulted in more complete temporal and spatial development of depositional environments during clinoform deposition as well as depositional features. Mapping of the depositional features across clinoforms resulted in considerable range of reservoir sandbody types that can be recognized on 3D seismic within Pannonian Basin System.
